APPROVED CRANE WEIGHING SYSTEM

The specialist in mobile approved weighing systems.

APPROVED CRANE WEIGHING SYSTEM

This system weighs the waste in above/under-ground containers. The advantage of this weighing system is that it completely wireless is, so broken cables are a thing of the past. The operation can be done via the existing radio controls of the crane.

HOW DOES IT WORK?

the computer or the location will be automatically determined based on GPS coordinates. When the container is "Fully" in the air, the operator presses the button "first weighing" on the control panel. When weighing is confirmed an indicator lamp is illuminated. After emptying the container the operator presses the button, "second weighing", the weight of waste is then calculated & stored in the computer.

DATA TRANSFER

Weighing data can be stored together with other relevant information such as customer and container details. The data can be printed on to a weighing ticket and send into the cloud by an 3G/4G internet connection.

THE SPECIALIST IN MOBILE APPROVED WEIGHING SYSTEMS

Why? Besides our years of experience you can be assured of our service from A to Z. We offer a wide range of innovative systems. From Total Body weighing systems, Crane weighing systems to Bulk weighing systems and will be pleased to think along with you or for you.

TECHNICAL DATA

CONFIGURATION:

- Weighing capacity from 1.000 to 5.000 kg with accuracy to 2 or 5 kg.
- Ticket or roll printer standard with all versions
- Approved to European Standard class III.

OPTIONAL:

- Weighing confirmation via control panel from the crane
- Entering type of waste.
- Links to your network, board computer, GPS/GPRS etc.

CORPORATE SOCIAL RESPONSIBILITY (CSR)

Of course a satisfied customer will always be our number one priority, but this doesn't mean that we don't care about our surroundings. We do more as just weighing. Welvaarts is continually looking for ways to make a meaningful contribution to society and the environment.

That's why we support various charities and work as green as possible.
