APPROVED SKIP LIFT CONTAINER WEIGHING SYSTEM

APPROVED SKIP LIFT CONTAINER WEIGHING

This system is suitable for weighing every Skip Lift container. Advantages of this system are that the net weight is instantly calculated upon collection of the container & that it is completely wireless, so broken cables are past.

HOW DOES IT WORK?

When placing the container the weight of the “empty” container is stored. When collecting the “full” container the weight is stored again and the net weight will be calculated. This net weight can be printed directly on a ticket. It is also possible to do only an “second” weighing with a full container. The empty container weight can then be given in by a Preset tare & the net weight will be directly displayed.

DATA TRANSFER

Weighing data can be stored together with other relevant information such as customer and container details. The data can be printed on to a weighing ticket and send into the cloud by an 3G/4G internet connection.

THE SPECIALIST IN MOBILE APPROVED WEIGHING SYSTEMS

Why? Besides our years of experience you can be assured of our service from A to Z. We offer a wide range of innovative systems. From Total Body weighing systems, Crane weighing systems to Bulk weighing systems and will be pleased to think along with you or for you.

TECHNICAL DATA

CONFIGURATION:

- Maximum weight from 14.000 to 18.000 kg with accuracy to 20 kg.
- Ticket printer standard with all versions
- Approved to European Standard class III.

OPTIONAL:

- Connectable to your network, board computer, GPS/GPRS etc.

CORPORATE SOCIAL RESPONSIBILITY (CSR)

Of course a satisfied customer will always be our number one priority, but this doesn't mean that we don't care about our surroundings. We do more as just weighing. Welvaarts is continually looking for ways to make a meaningful contribution to society and the environment.

That's why we support various charities and work as green as possible.
