- **NETWORK CONNECTION**

APPROVED TOTAL BODY WEIGHING SYSTEM FOR BULK TRUCK OR TANKER

APPROVED TOTAL BODY WEIGHING SYSTEM FOR BULK TRUCK OR TANKER

The system weighs the loaded or unloaded product. For each customer the weighing system determines the (un)loaded weight. This (un)loaded weight can be directly printed on to a ticket or invoice. Advantages of this system are that the truck can depart fully loaded. The operation is of course very simple.

HOW DOES IT WORK?

Upon arrival the driver enters the customer or location code. The weighing system automatically does the first weighing. After (un)loading the bulk/tank the driver does a second weighing. The difference between first and second weighing is the net (un)loaded weight. The computer stores this weight.

DATA TRANSFER

Weighing data can be stored together with other relevant information such as customer and container details. The data can be printed on to a weighing ticket and send into the cloud by an 3G/4G internet connection.

TECHNICAL DATA

CONFIGURATION:

- Weighing capacity from 10.000 to 40.000 kg with accuracy to 10, 20, 50 or 100kg.
- Ticket printer standard with all versions.
- Approved to European Standard class III or IV, (suitable for recyclable materials or waste).

CORPORATE SOCIAL RESPONSIBILITY (CSR)

Of course a satisfied customer will always be our number one priority, but this doesn't mean that we don't care about our surroundings. We do more as just weighing. Welvaarts is continually looking for ways to make a meaningful contribution to society and the environment.

That's why we support various charities and work as green as possible.
