APPROVED WEIGHING SYSTEM FOR TAILLIFT

The specialist in mobile approved weighing systems.

APPROVED WEIGHING SYSTEM FOR TAILLIFT

This system is suitable for determining the weight on the platform. Upon calculation of the weight an invoice can be directly printed off. The operation is simple.

HOW DOES IT WORK?

Upon arrival the driver enters the customer number into the computer. A Pre-set Tare and/or type of waste can also be given in. When the load is placed on the platform a weighing can be done. The net weight can be stored and/or printed on a ticket.

DATA TRANSFER

Weighing data can be stored together with other relevant information such as customer and container details. The data can be printed on to a weighing ticket and send into the cloud by an 3G/4G internet connection.

TECHNICAL DATA

CONFIGURATION:

- Weighing capacity from 500 to 2000 kg with accuracy to 1 or 2kg.
- Ticket printer standard with all versions
- Approved to European Standard class III or IV

OPTIONAL:

- Links to your network, board computer, GPS etc.

CORPORATE SOCIAL RESPONSIBILITY (CSR)

Of course a satisfied customer will always be our number one priority, but this doesn't mean that we don't care about our surroundings. We do more as just weighing. Welvaarts is continually looking for ways to make a meaningful contribution to society and the environment.

That's why we support various charities and work as green as possible.
